Randomized Trial to Prevent Vascular Events in HIV

WE DID IT!!!

Congratulations to the University of Southern California CRS, Site 1201 for enrolling the 7500th participant!

From REPRIEVE Leadership:

This is a tremendous accomplishment for REPRIEVE and we want to thank *every* site team for working so incredibly hard to help reach this major milestone.

REPRIEVE is the largest randomized controlled trial in people with HIV as well as the largest ACTG study to date. This study is a success because of the dedication from sites in 11 countries around the world and equally important is the dedication of REPRIEVE participants. We would also like to recognize the collaboration of our

supporters, the NHLBI, NIAID, Kowa Pharmaceuticals America, Inc. and Gilead Sciences, Inc.

We look forward to working with you during the next phase of REPRIEVE and together we will continue to make REPRIEVE a success!

Sincerely,

Dr. Steven Grinspoon and Dr. Pamela Douglas, Co-Principal Investigators of the
Clinical Coordinating Center
Dr. Udo Hoffmann and Dr. Heather Ribaldo, Co-Principal Investigators of the Data
Coordinating Center

As a reminder, the study has closed to screening as of today (Thursday, February 7, 2019) at 9:00 AM EST.

Accrual of participants in screening must be completed within 45 days from today (Thursday, February 7, 2019) and not exceed the protocol defined screening period. Please be aware, **enrollment cannot exceed 7575 participants**. Sites will receive further notification about the date of closure to accrual.

Please continue to email the team at actg.corea5332@fstrf.org if there are any questions regarding the management of participants still on study.
